**Stunning
Live Video.
Anytime,
Anywhere.**

The Advent Mantis MSAT portable satellite terminal enables high performance video and data communications anywhere in the world within five minutes of being onsite. The MSAT is available as a Ka, Ku or X-band system with either a 65, 90 or 120cm reflector.

It can be configured with either a customer specified modem or Advent DVE H.264 encoder built in and is available as a manual or fully motorised system, and all this in only one flight case weighing less than 23kgs. It is as 'go anywhere' as your operations need.
