## STAC VIP

COMREX WORLD-CLASS  
VOIP TALK SHOW  
MANAGEMENT SYSTEM

**Sound amazing.** With groundbreaking audio quality over IP networks, STAC VIP leads the charge in migrating old-fashioned on-air telephones to dramatically clear wideband audio quality.

STAC VIP smoothly integrates legacy POTS lines with VoIP technology to deliver a new way to manage telephone calls for talk shows, interviews, and contests.

Able to take traditional calls, STAC VIP also breaks new ground by handling calls from "HD Voice" capable telephones and smartphone apps.

## LIVESHOT

THE NEXT GENERATION  
OF LIVE ENG

**As live as it gets.** Comrex LiveShot delivers live, two-way, HD video and audio over a range of IP networks at latencies as low as less than 200mS. Utilizing sophisticated CrossLock VPN technology, LiveShot can make use of even the most challenging 3G/4G, Wi-Fi, and satellite networks to maintain a secure and stable connection.

Compact with a versatile interface that can be camera-mounted or slung over your shoulder in LiveShot Pouch, and light-weight at only 3 pounds, LiveShot is portable and designed for the most demanding field broadcasts.

Used by TV stations, networks, sports franchises, and government organizations for a broad range of applications, LiveShot is ideal for streaming low-latency broadcast quality audio and video from anywhere Internet is available.
