

# VISLINK

The L1700 range of wireless video transmitters represent the next generation of flexible wireless systems from Link.

Now even more powerful this new range is the most compact and versatile available.

With multiple inputs and mounting options this unit can be mounted to a full broadcast camera for sports broadcasters or ENG camera for news or even a prosumer camera to broaden the market reach further.

## Clip-On 4 Wireless Camera Transmitter

Clip-on 4 is designed for use with both HD and SD cameras for electronic newsgathering, television outside broadcasts and studio applications.

With latency down to one frame (33ms), and using the latest H.264 or MPEG-2 encoding, the Clip-On 4 offers exceptional picture quality and capability.

Full remote control of broadcast cameras is available when used in conjunction with the Gigawave Camera Control system.
